LABOR MARKET DIGEST

May Data

July 2007

Gross State Product in Maine

The U.S. Bureau of Economic Analysis recently released estimates of gross state product (GSP) by state and industry for 2006. GSP is the value added in production by labor and property located in a state.¹

Inflation-adjusted GSP increased 1.9 percent in Maine in 2006, up from the 1.2 percent increase in 2005. Among the states, Maine ranked 41st in growth between 2005 and 2006, trailing national growth of 3.4 percent and New England growth of 2.5 percent.

Private industries accounted for 82.2 percent and government 12.8 percent of 2006 GSP in Maine. Among private industries, the five sectors with the highest value of GSP were real estate, rental, and leasing; manufacturing; health care and social assistance; retail trade; and finance and insurance. The five sectors with the lowest value of GSP were mining; arts, entertainment, and recreation; educational services; management of companies and enterprises; and agriculture, forestry, fishing, and hunting.

GSP in the private sector increased at a faster pace than in government (2.1 vs. 0.8 percent) between 2005 and 2006. Within the private sector, the fastest rates of GSP growth were in agriculture, forestry, fishing, and hunting; administrative and waste services; information; professional and technical services; and durable goods manufacturing.

Maine Gross State Product

(in millions of chained 2000 dollars)

Industry	2004	2005	2006	Percent Change	
				2004 to 2005	2005 to 2006
Total Gross Domestic Product by State	38,862	39,312	40,050	1.2	1.9
Goods-Producing Industries					
Agriculture, forestry, fishing, and hunting	583	563	646	-3.4	14.7
Mining	6	5	5	-16.7	0.0
Construction	1,801	1,783	1,753	-1.0	-1.7
Manufacturing	4,888	5,090	5,189	4.1	1.9
Durable goods	2,554	2,604	2,681	2.0	3.0
Nondurable goods	2,336	2,489	2,511	6.5	0.9
Service-Producing Industries					
Utilities	795	817	800	2.8	-2.1
Wholesale trade	2,259	2,172	2,172	-3.9	0.0
Retail trade	3,903	3,966	4,075	1.6	2.7
Transportation and warehousing, excluding Postal Service	875	890	892	1.7	0.2
Information	1,260	1,351	1,411	7.2	4.4
Finance and insurance	2,546	2,586	2,613	1.6	1.0
Real estate, rental, and leasing	5,221	5,285	5,438	1.2	2.9
Professional and technical services	1,834	1,912	1,978	4.3	3.5
Management of companies and enterprises	437	367	373	-16.0	1.6
Administrative and waste services	824	851	895	3.3	5.2
Educational services	344	350	350	1.7	0.0
Health care and social assistance	3,927	4,032	4,149	2.7	2.9
Arts, entertainment, and recreation	324	325	334	0.3	2.8
Accommodation and food services	1,190	1,188	1,219	-0.2	2.6
Other services, except government	809	803	790	-0.7	-1.6

Numbers in the table may not add to totals due to rounding.

¹ GSP is defined as total gross output (sales or receipts and other operating income, commodity taxes, and inventory change) minus intermediate inputs (consumption of goods and services purchased from other U.S. industries or imported).

¹ Civilian labor force, employed, and unemployed estimates are by place of residence. Current year estimates are preliminary; year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

² Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

³ People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: 1) they were not employed during the survey week; 2) they were available for work at that time; and 3) they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

⁴ The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force and is expressed as a percent.

⁵ Bangor; Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

⁶ Adjacent metropolitan and/or micropolitan statistical areas that have a specific level of economic integration, but still retain separate identities.

⁷ Maine portion of the area which includes towns in both Maine and New Hampshire.

Area Analyst's Corner

Central Maine Merrill Huhtala (207) 621-5196

Backyard Farms plans to build an additional greenhouse next to its existing 25-acre facility in Madison. Their 3 to 5-year plan calls for three additional greenhouses and more than 300 employees. ♦ **John Martin's Manor**, a Waterville restaurant for 30 years, closed in June. Thirty-six employees were impacted by the closing. The Turf Club off-track betting parlor will remain open, with the hope of expanding the convention center and banquet space to include the entire facility. ♦ **Little River Apparel**, currently with 200 employees in Belfast, will double the size of its facility and boost production of chemical warfare protective clothing manufactured for the military.

Western Maine Gerard Dennison (207) 753-9045

The **Strong Hardwood Sawmill** in Strong closed, leaving 36 employees with a questionable future. Market conditions will be reviewed and a decision made to either reopen or close permanently during the first week of September. ♦ **World Harbors Inc.**, a manufacturer of fine marinade cooking sauces, is adding to its existing production plant in Auburn, and will create five new jobs. The company will have the ability to package new types of planned products in different types of packaging more quickly. ♦ **Bates College** in Lewiston is building a dormitory on College Street that is scheduled to open in September 2007. The college is also building a dining hall which is expected to open in January 2008.

North/East Maine Craig Holland (207) 941-3076

Lowe's Home Centers Inc. in Brewer is expected to open later this year. The estimated \$18 million retail store is expected to employ 180 to 200 people, with 80 percent of those full time. ♦ **Red Shield Environmental** has begun producing pulp at the former Georgia-Pacific mill in Old Town, creating approximately 100 jobs. ♦ For the third time this year, the **Domtar Inc.** pulp and paper mill, Washington County's largest employer, is shutting down its paper machine. The move will idle about 90 employees indefinitely. The mill, which dates to 1906, has about 500 workers. The company blamed the latest shut-down on poor market conditions.

Southern Maine Gerard Dennison (207) 753-9045

L.L. Bean has announced plans for a theme park on 700 acres the company owns in Freeport. The recreation center is intended to make Freeport a vacation destination, as well as a retail spot. No figures are yet available regarding costs or job creation. ♦ **Portland International Jetport** officials have announced plans to build a \$36.1 million parking garage. The building will add over 1,000 additional spaces. Officials stressed that the funding would come from jetport revenue and not tax dollars.

Maine Unemployment Rate 4.5 Percent in May

State Labor Commissioner Laura Fortman announced that the preliminary seasonally-adjusted May unemployment rate for Maine was 4.5 percent, up from 4.3 percent in April and unchanged from 4.5 percent for May 2006. The national unemployment rate for May was 4.5 percent.

“Seasonally-adjusted employment in Maine declined slightly between April and May, but remained up by 3,700 over the year,” said Commissioner Fortman. “The poor spring weather was the probable culprit behind less-than-expected seasonal employment gains between April and May, particularly in the leisure and hospitality services, retail trade, and construction industries.”

Between May 2006 and May 2007, the total number of seasonally-adjusted nonfarm wage and salary jobs increased by 2,100 to 617,200. Over-the-year job gains were recorded in health care and social assistance; trade, transportation, and utilities; professional and business services; construction; and information. Job losses were registered in manufacturing, financial activities, other services, and government.

Other New England states reporting a seasonally-adjusted unemployment rate for May include New Hampshire, 3.9 percent; Connecticut, 4.5 percent; Rhode Island, 4.8 percent; and Massachusetts, 5.1 percent. The adjusted national rate for May was 4.5 percent, unchanged from 4.5 percent for April and down from 4.6 percent for May 2006. The not-seasonally-adjusted Maine unemployment rate for May was 4.3 percent, down from 4.6 percent for April and 4.4 percent for May 2006. The unadjusted national rate was 4.3 percent for May, unchanged from 4.3 percent for April and down from 4.4 percent for May 2006. Not-seasonally-adjusted May unemployment rates for Maine counties ranged from 3.2 percent for Cumberland County to 7.6 percent for Piscataquis County.

Not-seasonally-adjusted nonfarm wage and salary jobs in Maine rose by 11,100 between April and May as employers continued gearing up for the summer season. The largest gains were recorded in leisure and hospitality services, construction, retail trade, and professional and business services.

¹ Hours worked and earnings data are computed based on payroll figures for the week including the 12th of the month for manufacturing production workers. Average hourly earnings are calculated on a gross basis, and include such factors as premium pay for overtime and shift differential, as well as changes in basic hourly and incentive rates of pay. Average weekly earnings are the product of weekly hours worked and hourly earnings.

Footnotes: From page 6.

¹ Nonfarm wage and salary employment estimates include all full- and part-time wage and salary workers who worked during or received pay for the pay period which includes the 12th of the month. Domestic workers in private households, proprietors, the self-employed, and unpaid family workers are excluded. Estimates measure the number of jobs by industry. Current month's estimates are preliminary; prior month and year-ago estimates are revised. These estimates are benchmarked to March 2006. As a measure of reliability, the March 2006 benchmark revision for total nonfarm wage and salary employment was 0.4 percent higher than the original sample-based estimate.

² Regular teachers are included in summer months whether or not specifically paid in those months.

* Where an employment estimate is not entered, either the data is not available in sufficient detail for publication or is nondisclosable by law.

Participation Rates for Defined Contribution Plans

Primarily Reflect How Frequently Employers Provide Access to These Plans

Nationwide in 1992-93, 32 percent of workers in private industry participated in a defined benefit plan while 35 percent participated in a defined contribution plan. The participation rate for private industry workers in defined benefit plans has decreased to 20 percent, while participation in defined contribution plans has increased to 43 percent according to the 2006 National Compensation Survey conducted by the Bureau of Labor Statistics.

Two other statistics that give additional insight to participation rates are access rates and take-up rates. Access rates measure the proportion of employees who work for employers who offer them a retirement plan. Take-up rates measure the proportion of employees among those with access who choose to enroll in the plans. Take-up rates differ from participation rates because they reflect the elections of only those workers who actually have access to a retirement plan. Participation rates reflect the status of all workers, including those without access.

Differences observed in participation rates for defined contribution plans are due more to access rates than to take-up rates. While access rates vary widely among groups of workers, take-up rates are consistently robust.

Characteristic	Access	Take-up Rate
All Workers	54	79
White Collar	65	82
Blue Collar	53	77
Service	30	65
Full time	63	80
Part time	25	65
Less than \$15 per hour	43	71
\$15 per hour or more	69	85
1-99 workers	41	81
100 or more workers	70	77
Union	50	86
Nonunion	55	78

Access rates have a large impact on participation rates. For example, although workers in small and large establishments elect to enroll in defined contribution plans at similar rates, about half of workers in establishments employing 100 or more workers participate in a plan, compared with about one-third of those in smaller establishments. These differences largely reflect the access rates of workers in the two establishment size classes.

Size of Establishment	Take-up Rate	Access Rate	Participation Rate
1-99 workers	81	41	33
100 or more workers	77	70	54

Excerpted from "Access, Participation, and Take-up Rates in Defined Contribution Retirement Plans among Workers in Private Industry, 2006", by Allan Beckman, U.S. Department of Labor, Bureau of Labor Statistics, December 2006.
